Keynote:	Sam Price, MA FREng FICE FStructE HonFRIBA Founding Member of Price & Myers, London, UK
Registration:	www.seabc.ca/agm or use attached mail-in form

Keynote Presentation:

A Unique Structural Engineering Perspective

Price & Myers projects cover an unusually wide range - both in size and type. The firm's diverse portfolio displays an amazing contrast of aesthetics and outstanding structures together with latest technology and traditional crafts, applied to everything from outstanding modern designs to the refurbishment of ancient monuments - all done with a class of signature Sam Price influence.

Sam's notable works range from the ultra-elegant expressive form of the new Bishop Edward King Chapel at Oxfordshire; through the creation of a modern landmark from the ancient ruins at Astley Castle in Warwickshire; via a classic three-storey residence with its dramatic grand staircase in Queens Drive London; to the breathtaking 55m stainless steel Meads Reach Footbridge in Bristol - all simply stunning. He embraces 'new build', restoration and adaptations; each treated attentively with an apparent simplicity that often belies the complex engineering lurking beneath propelled by a unique Perspective best described as: curious, thoughtful and rigorous, from first principles, creating sophisticated construction solutions integrating structural mechanics and architectural design with scientific knowledge and techniques from diverse fields including aerospace engineering, computer programming, and digital manufacture.

Join us as we explore this valued Perspective – a masterful expression of Sam's art!
